

Design and Develop Assessments

OUTCOMES

This workshop empowers delegates to:

- Demonstrate understanding of design principles of outcomes-based assessment.
- Design outcomes-based assessments.
- Develop assessment activities.
- Develop assessment guides.
- Evaluate assessment designs and guides.

Who should attend?

- Qualified Assessors
- Trainers
- Educators
- Training Facilitators

Duration

2 Days

NQF Alignment

US Title: ***Design and Develop outcomes-based assessments***

SAQA US ID: 115755 (10 credits on NQF Level 6)

Entry Requirements: Achieved US 115753 (Assessor) and competent in the field in which assessments are being designed.

TRAINING CONTENT

- Demonstrate understanding of design principles of outcomes-based assessment.
 - Compare outcomes-based design with other forms of design
 - Identify the key differences between design for RPL assessment vs programme-based assessment
 - Describe different assessment methods application in different contexts.
- Design outcomes-based assessments.
 - Understand the context in terms of special needs, cost-effectiveness and the overall assessment plan.
 - Understand that the assessment design must ensure the collection of valid and sufficient evidence and identify potential unfair barriers to achievement by candidates.
- Develop assessment activities
 - Activities to facilitate the production of valid, sufficient, authentic and current evidence
 - Promote integrated assessment
- Develop assessment guides
 - Guides to contain all the details needed by the assessor and provides clear details of the assessment activities
 - The guide to include appropriate support material, including observation sheets, checklists and memoranda as applicable.
- Evaluate assessment design and guides
 - Evaluation results are described in terms of good principles of assessment.
 - Evaluations are carried out in line with quality assurance requirements.
